Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Secure Authentication & RBAC	User registration, login with password hashing, and Role-Based Access Control (Admin, Officer, Analyst).	Implemented	Yes	Working seamlessly with the SQLite database and Flask session management.
2	ML Prediction Engine	Integrated XGBoost classification model to predict loan eligibility based on real-time user financial inputs.	Implemented	Yes	Model successfully trained, serialized, and deployed with high accuracy.
3	Prediction History & Reports	for Admins).	Implemented	Yes	Successfully querying and displaying historical data from the database.
4	Modern, Responsive UI/UX	Custom frontend design featuring dynamic animations, split-screen layouts, and premium popups (SweetAlert2).	Implemented	Yes	Interface is highly intuitive, fully responsive, and ATS-friendly.
5	Automated Email Verification	Sending an automated email to verify a new user's identity upon registration.	Pending	No	Currently relying on strict password validation and manual admin verification. Planned for Phase 2.
6	Hierarchical Dashboards	Customized, secure UI views tailored to specific user roles (e.g., User Management for Admins).	Implemented	Yes	Routes are securely protected; unauthorized access is blocked.

Feature Implementation Summary:

Total Features Proposed	6
--------------------------------	---

Total Features Implemented	5
Total Features Demonstrated	5
Overall Implementation Rate (%)	83.33%
