

Brainstorming & Idea Prioritization Template

Date	15 March 2024
Team ID	XXXXXX
Project Name	Smart Lender – Loan Eligibility Prediction System
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Pushpa Sree	Develop the Flask backend, integrate the machine learning model, and build the server-side prediction pipeline.	Backend Development	1
2	Vikyath Reddy	Design a modern, responsive user interface with an interactive loan application form and dashboard.	Frontend Development	2
3	Venkata Sai Rohith	Perform quality assurance testing, validate application functionality, and improve the user interface based on testing feedback.	Testing & QA	3
4	Venkata Darshini	Prepare comprehensive project documentation, architecture diagrams, technical reports, and software engineering artifacts.	Technical Documentation	4
5	Pushpa Sree	Train and evaluate multiple machine learning models to select the most	Machine Learning	1

Brainstorming & Idea Prioritization Template

		accurate loan prediction model.		
6	Entire Team	Integrate frontend, backend, machine learning model, testing, and documentation into a complete Smart Lender application.	System Integration	5

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Develop the backend application with machine learning model integration for accurate loan eligibility prediction.	High	High	1	YES
2	Build a responsive and user-friendly web interface for seamless loan application and prediction.	High	High	2	YES
3	Perform comprehensive testing, prepare project documentation, and integrate all project components	High	High	3	YES

Brainstorming & Idea Prioritization Template

	for final deployment.
