Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	• Visits the Smart Lender website. • Reviews loan eligibility requirements. • Collects personal and financial details.	• Enters applicant details into the web form. • Submits the loan application. • Waits for the system to process the request.	• Views the loan eligibility result. • Uses the prediction to plan the next steps. • Proceeds with or improves the loan application.
Touchpoint <i>What part of the service do they interact with?</i>	• Home Page • Loan Information Section • Web Browser	• Loan Prediction Form • Flask Web Application • Prediction Engine	• Prediction Result Page • Approved / Rejected Message • Web Interface
Customer Thought <i>What is the customer thinking?</i>	• Am I eligible for a loan? • What information do I need? • Will the process be simple?	• I hope I entered the correct details. • Will my loan be approved? • How accurate is the prediction?	• The prediction helps me understand my eligibility. • I now know what to do next. • The process was quick and easy.

Customer Feeling <i>What is the customer feeling?</i>	Curious, Hopeful, Slightly Anxious	Focused, Expectant, Optimistic	Relieved and Confident (if approved) / Motivated to improve eligibility (if rejected)
Process Ownership <i>Who is in the lead on this?</i>	Loan Applicant	• Loan Applicant & Smart Lender System	• Smart Lender System & Loan Applicant
Opportunities	• Provide clear loan eligibility guidelines. • Offer a simple and intuitive interface. • Educate users about required documents. • Provide clear loan eligibility guidelines. • Offer a simple and intuitive interface. • Educate users about required documents. • Provide clear loan eligibility guidelines. • Offer a simple and intuitive interface. • Educate users about required documents.	• Improve input validation. • Reduce processing time. • Enhance prediction accuracy using machine learning. • Improve input validation. • Reduce processing time. • Enhance prediction accuracy using machine learning. • Improve input validation. • Reduce processing time. • Enhance prediction accuracy using machine learning.	• Display prediction confidence. • Provide personalized improvement suggestions for rejected applicants. • Allow users to save or download their prediction results. • Display prediction confidence. • Provide personalized improvement suggestions for rejected applicants. • Allow users to save or download their prediction results. • Display prediction confidence. • Provide personalized improvement suggestions for rejected applicants. • Allow users to save or download their prediction results.

How can we improve this	• Add eligibility calculators and FAQs. • Simplify the application process. • Improve user guidance.	• Enable auto-fill and real-time form validation. • Improve UI/UX for better accessibility. • Optimize model performance.	• Explain why the loan was approved or rejected. • Integrate credit score analysis. • Add an admin dashboard and application history for future enhancements.
