Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

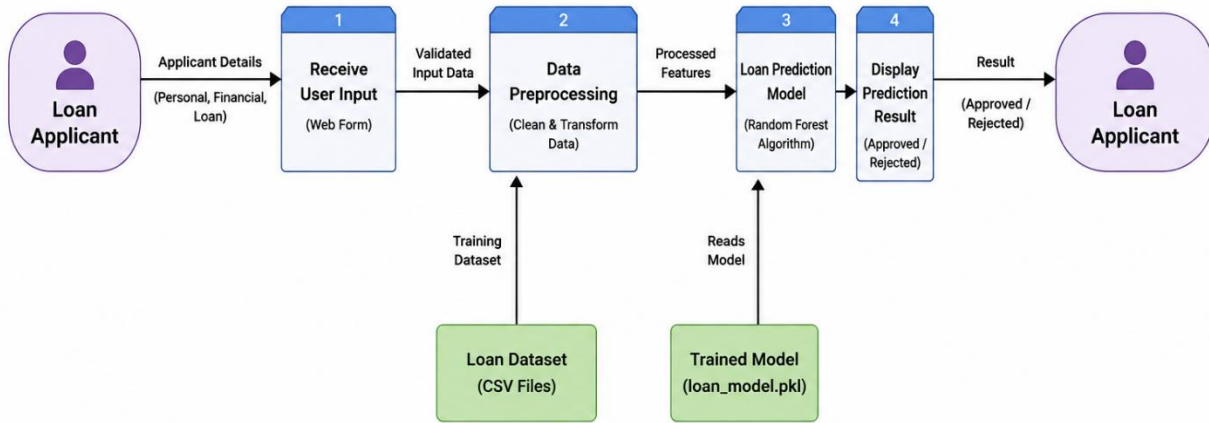

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	Loan Applicant
Rectangle with numbered header	Process	☐ Receive User Input ☐ Data Preprocessing ☐ Loan Prediction using Random Forest ☐ Display Prediction Result
Rectangle (solid fill, no number)	Data Store	☐ Loan Dataset (CSV) ☐ Trained Model (loan_model.pkl)
Labeled arrow	Data Flow	☐ Applicant Details ☐ Validated Input ☐ Processed Features ☐ Loan Prediction ☐ Approved/Rejected Result

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.

Data Flow Diagram (Level-1)

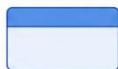

DFD Symbol Legend

External Entity

Person, organization, or system outside the project that sends or receives data.

Process

An activity that transforms incoming data into outgoing data.

Data Store

A place where data is held for later use.

Data Flow

The movement of data between entities, processes, and data stores.
